## Commercial Solar Installation Case Study

### Pioneers Memorial Hospital

Financially-sponsored by Imperial Irrigation District (IID), this ground-mounted system was commissioned in 2008 at Pioneers Memorial Healthcare District (PMHD). In partnership with Johnson Controls, Inc., Baker Electric Solar performed this installation as part of IID's commitment to renewable resources. IID Energy is one of the fastest-growing utilities in the nation, providing electric power to 140,000 customers in Imperial, Riverside, and San Diego Counties. The Photovoltaic system is expected to generate more than 100,000 kW of clean, renewable energy..
